May 9th, 2020 – in this framework the decidability of a property is quite often reduced to the decidability of the membership in a pseudovariety of semigroups for example a language of finite words can be expressed by a sentence of the first order fragment fo 2 if and only if its syntactic semigroup belongs to the pseudovariety da as shown by thérien and wilke’

april 7th, 2020 - lundi 18 juin 2012 à 16h en salle 1d23 sergei starchenko notre dame on peterzil steinhorn subgroups in the paper definable pactness and definable subgroups of o minimal groups y peterzil and c steinhorn showed that to any unbounded curve in a group definable in an o minimal structure one can associate a definable one dimentional
interrogation de bases de connaissances avec règles

December 22nd, 2019 - various restrictions on sets of rules have been proposed to regain the decidability of the entailment problem our specific contribution is two fold first we propose a new tool that allows to unify and extend most of the known existential rule classes that rely on acyclicity conditions to tame infinite forward chaining without increasing the plexity of the acyclicity recognition
